DESCRIPTION

SikaBiresin® CR83 is an epoxy resin system suitable for the production of high performance fiber reinforced composite parts and molds with thermal properties up to 84 °C by vacuum infusion process.

PRODUCT BENEFITS

- Very fast infusion of fabrics and non-wovens
- Wide range of processing times
- DNV GL approved. Certificate No. TAK000019Z
- Resin component (A) has a low tendency to crystallize

AREAS OF APPLICATION

SikaBiresin® CR83 is especially suited to infusion and injection processes. With its very low viscosity it is designed for large parts that require a fast infusion. For example in marine or wind applications.

This product is suitable for experienced professional users only. Tests under actual processing conditions and with additional materials such as fibers and release agents must be performed to proof material compatibility.

METHOD OF APPLICATION

Mixing process

The components must be mixed homogeneously by using the common mixing techniques for composite resins. To get full performance, the indicated mixing ratio must be respected precisely.

The temperature of the mixture has a direct influence on the viscosity and pot life of the resin system.

Note: Release agents or other additives can influence the material properties and performance.

Application

The resin system is optimized for processing temperatures between 18 °C – 25 °C. Consider the change in processing parameters if the resin system is processed at different temperatures. The curing must be performed at temperature ≥ 18 °C.

Information regarding reactivity and viscosity development of different combinations of SikaBiresin® CR83 are shown in the diagrams below.

Diagram 1: Reactivity at 23 °C in a 100 ml insulated cup

Diagram 2: Viscosity development

Prior to application, check both components for crystallization. The crystallization process can be reversed by heating the product to 60 °C – 70 °C until the crystals are no longer visible.

Parts produced with SikaBiresin® CR83 must undergo a pre-curing of at least 4 hours at 40 °C before removing from the mold.

Containers must be closed tightly immediately after each use to prevent moisture ingress.

Postcuring

Mechanical and thermal values of the laminated part depend on various factors, such as laminate thickness, fiber volume content, reactivity of the resin system as well as chosen curing cycle. For information concerning suitable curing cycles consult the General Guideline for Composite Resins.

Removal

Uncured SikaBiresin® CR83 can be removed from tools and equipment with Sika® Reinigungsmittel 5 or another suitable solvent. Once cured, the material can only be removed mechanically. Hands and exposed skin shall be washed immediately using industrial hand cleaner and water.

Do not use solvents on skin.

STORAGE CONDITIONS

All components must be stored between 15 °C – 30 °C.

Prior to use check the material for homogeneity and crystallization and make sure to temper it to processing temperature.

HEALTH AND SAFETY INFORMATION

For information and advice regarding transportation, handling, storage and disposal of chemical products, users shall refer to the actual Safety Data Sheets containing physical, ecological, toxicological and other safety-related data.

DISCLAIMER

The information, and, in particular, the recommendations relating to the application and enduse of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
